

10 Facts Every Hy-Tran[®] Man Should Know

HY-TRAN[®] ULTRA[™]
PREMIUM TRACTOR FLUID

SINCE 1963

CONTENTS 5 GALLONS
NET 18.93 LITERS

MS
372

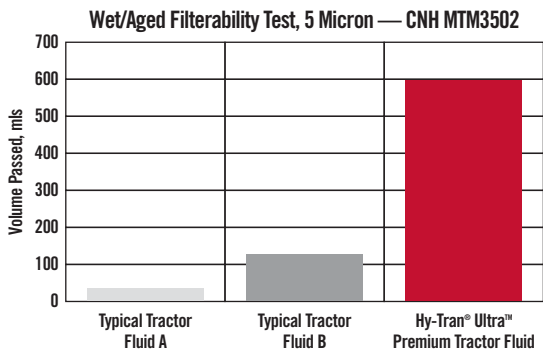

Only Hy-Tran[®] has been providing the North American farmer with worry-free protection and performance since 1963. “Universal” tractor fluids have not.

That's a fact.

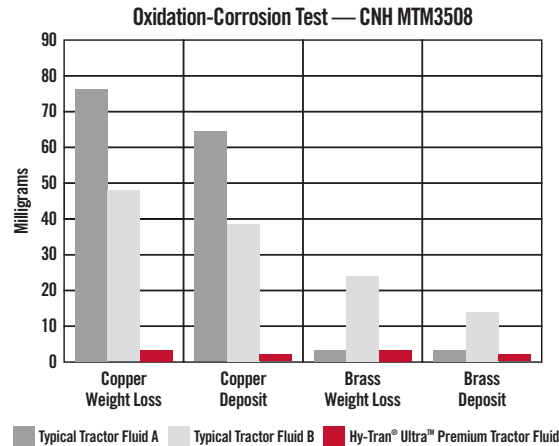

Here are 10 more facts every Red-blooded Hy-Tran® Man should know...

- #1 Hy-Tran is the only fluid tested and approved by Case IH engineering for your Magnum and Steiger tractors and Axial Flow combines.
- #2 Many manufacturers claim their “universal” tractor fluids meet Case IH specifications. The truth is, these fluids **have not** been tested by our engineers. Your machines are far too valuable to risk the use of a lesser fluid.
- #3 Hy-Tran® Ultra™ is custom designed by Case IH to be the best-suited fluid to provide your Red machines with a long life — and you with worry-free operation.
- #4 Hy-Tran® Ultra™ can hold up to 1% of its volume in water — twice as much as most competing fluids — and not experience any harmful effects, such as additive fallout.
- #5 Hy-Tran® Ultra™ keeps filters from plugging up under extreme working conditions.

- #6 Hy-Tran® Ultra™ ensures brakes and clutches always operate smoothly, reducing wear, slippage and chatter.
- #7 Hy-Tran® Ultra™ is ideal for any weather. Hot, cold, dry or otherwise, it keeps your machines performing optimally.
- #8 Hy-Tran® Ultra™ is engineered to maintain a stable viscosity. Regardless of the conditions, it won't break down and cause sloppy hydraulic response.
- #9 Hy-Tran® Ultra™ is zinc-free. Typical tractor fluids contain zinc, which, when exposed to moisture and excessive heat, can become corrosive and attack the soft metals in transmissions and hydrostats. Hy-Tran's™ non-zinc additives protect your equipment against excessive corrosion and rust.

- #10 For more than four decades, Hy-Tran® Ultra's™ proven worry-free performance has minimized equipment downtime and kept millions of farmers' Red machines running strong.

Hy-Tran™ has been helping generations of Red farmers, like the Brandes family, be more productive. (Left to Right) EVAN BRANDES, JEFF JOHNSON, EARL BRANDES, ROGER BRANDES, BEAU BEARNES, Brandes Farms, Nebraska. Hy-Tran men since 1963.
